

Remarks

Applicants request consideration on the merits of the above-referenced patent application.

I. Amendments to the specification

In accordance with 37 C.F.R. §1.78 and MPEP §202.01, Applicants have amended the first paragraph of the specification (*i.e.*, lines 4-7 on page 1) to identify the patent applications to which this patent application claims priority. Applicants request that replacement lines 4-7 on page 1 be entered into this patent application. The attached Appendix A on page 8 provides a marked-up version of lines 4-7 on page 1 showing the amendments. Applicants do not believe that this amendment introduces new matter.

II. Amendments to the claims

This Preliminary Amendment A cancels claims 18-21. Thus, claims 1-17, 22, and 23 are pending. Claims 5, 7, 9, 11, and 17 have been amended. All the claims, including the amendments, are shown in the previous section. Applicants submit that the amendments do not introduce new matter. Specifically:

Claims 5, 7, 9, and 11 have been amended to depend from claim 2 rather than from any one of claims 2, 3, or 4.

Claim 17 has been amended to incorporate the subject matter of claims 18-23. This amendment is supported by originally-filed claims 18-23.

Other amendments simply rephrase the claims, or correct grammatical or obvious errors. Applicants submit that such amendments are permissible under MPEP §2163.07.

Applicants reserve the right to claim any canceled and/or unclaimed subject matter in one or more later-filed continuation and/or divisional applications.

If, however, Applicants owe any fee(s) in connection with this filing, the Commissioner is hereby authorized to charge those
